Department of Health and Family Welfare
(2013-2014)

Section 1: Vision, Mission, Objectives and Functions

Vision

Availability of quality Healthcare on equitable, accessible and affordable basis across regions and communities with special focus on under-served population and marginalized groups.

Mission

1. To establish comprehensive primary healthcare delivery system and well functioning linkages with secondary and tertiary care health delivery system. 2. To improve maternal and Child Health outcomes. 3. To reduce the incidence of communicable diseases and putting in place a strategy to reduce the burden of non-communicable diseases. 4. To ensure a reduction in the growth rate of population with a view to achieving population stabilization. 5. To develop the training capacity for providing human resources for health (medical, paramedical and managerial) with adequate skill mix at all levels. 6. To regulate Health service delivery and promote rational use of pharmaceuticals in the Country.

Objectives

- 1 Universal access to Primary Health Care services for all sections of society with effective linkages to secondary and tertiary health care.
- 2 Improving Maternal and Child Health.
- 3 Focusing on Population stabilization in the Country.
- 4 Developing human resources for health to achieve health goals.
- 5 Reducing overall disease burden of the society.
- 6 Strengthening Secondary and Tertiary Health Care.

Functions

- 1 1. Policy formulation on issues relating to health and family welfare sectors. 2. Management of hospitals and other health institutions under the control of Department of Health and Family Welfare. 3. Extending support to states for strengthening their health care and family welfare system. 4. Reducing the burden of Communicable and Non-Communicable diseases. 5. Focusing on development of human resources through appropriate medical and public health education. 6. Providing regulatory framework for matters in the Concurrent List of the Constitution viz. medical, nursing and paramedical education, pharmaceuticals, etc. 7. Formulation of guidelines on issues relating to implementation of National Leprosy Elimination Programme & strengthening supervision and Monitoring support to States/UTs.

Section 2: Inter se Priorities among Key Objectives, Success indicators and Targets

Objective	Weight	Action	Success Indicator	Unit	Weight	Target / Criteria Value				
						Excellent 100%	Very Good 90%	Good 80%	Fair 70%	Poor 60%
[1] Universal access to Primary Health Care services for all sections of society with effective linkages to secondary and tertiary health care.	32.00	[1.1] Strengthening of Health Infrastructure	[1.1.1] Operationalization of 24x7 Facility at PHC level out of the total number of 24000 PHCs	%	4.00	35.0	34.5	34.0	33.5	33.0
			[1.1.2] Operationalisation of CHCs into First Referral Units (FRU) out of the total number of 4000 CHCs	%	4.00	35.0	34.5	34.0	33.5	33.0
			[1.1.3] Increase in the service delivery by Mobile Medical Units (MMU) over baseline figure as on 31.03.2013	%	3.00	12	10	8	6	5
			[1.1.4] Increase in the number Patient Transported over the baseline figure for 2012-13.	%	4.00	12	10	8	6	5
		[1.2] Strengthening of Community involvement	[1.1.5] Establishment of Special New Born Care Units in District Hospitals	%	2.00	15	12	9	6	5
			[1.2.1] Utilization of funds by new Village Health, Sanitation & Nutrition Committees (VHSNC) released up to the end of previous financial	%	2.00	55	50	45	40	35

Section 2: Inter se Priorities among Key Objectives, Success indicators and Targets

Objective	Weight	Action	Success Indicator	Unit	Weight	Target / Criteria Value				
						Excellent	Very Good	Good	Fair	Poor
						100%	90%	80%	70%	60%
		[1.3] Augmentation of availability of Human Resources in identified High Priority Districts	year							
			[1.3.1] Deployment of new ANMs	Number	3.00	1300	1250	1000	900	800
			[1.3.2] Deployment of new Doctors/Specialists	Number	3.00	300	250	200	175	150
			[1.3.3] Deployment of new Staff Nurses	Number	3.00	600	500	450	400	375
			[1.4.1] ASHA Training (up to VI th & VIIth Module)	Number	4.00	100000	80000	60000	40000	20000
[2] Improving Maternal and Child Health.	8.00	[2.1] Promote Institutional Deliveries	[2.1.1] Institutional Deliveries as a percentage of total deliveries	%	3.00	85	82	80	78	75
			[2.2.1] Reduction in unsafe deliveries in identify High Priority Districts	%	2.00	6	5	4	3	2
			[2.3.1] Target Children immunised	%	3.00	87	85	83	81	79
			[3.1.1] Increase in IUCD insertions over previous financial year	%	2.00	15	10	8	7	6
[3] Focusing on Population stabilization in the Country.	8.00	[3.2] Registration of pregnancy in first trimester	[3.2.1] Increase in the registratin over the previous	%	2.00	20	15	12	10	8

Section 2:
Inter se Priorities among Key Objectives, Success indicators and Targets

Objective	Weight	Action	Success Indicator	Unit	Weight	Target / Criteria Value				
						Excellent	Very Good	Good	Fair	Poor
						100%	90%	80%	70%	60%
[4] Developing human resources for health to achieve health goals.	9.00	[3.3] Promoting Intra Uterine Device (IUD) Insertion	financial year							
			[3.3.1] Increase in IUD Insertion over the previous financial year	%	2.00	15	10	8	7	6
		[3.4] National Inspection & Monitoring Committee (PCPNDT Act) visits	[3.4.1] Increase in number of visits	%	2.00	25	20	18	15	10
			[4.1.1] Completion of Upgradation of Identified Medical Colleges	Number	5.00	24	20	15	13	10
		[4.2] Setting up one National Institute of Para-medical Sciences (NIPS) and 8 Regional Institutes of Paramedical Sciences (RIPS)	[4.2.1] Commencement of Work for NIPS	Date	1.00	05/03/2014	15/03/2014	20/03/2014	25/03/2014	31/03/2014
[5] Reducing overall disease burden of the society.	18.00	[4.3] Establishment of Nursing Institutes at various levels	[4.2.2] Commencement of Work for RIPS	Number	1.00	6	5	3	2	1
			[4.3.1] Commencement of teaching in ANM Schools	Number	1.00	27	25	20	15	3
			[4.3.2] Release of funds for establishment GNM Schools	Number	1.00	28	25	20	15	10
		[5.1] Reduce incidence of Malaria cases	[5.1.1] Annual Parasite Incidence (API)	Per 1000 population	2.50	1.30	1.40	1.52	1.67	1.80
			[5.2.1] Remaining Endemic Districts	Number	2.00	50	45	40	35	30

Section 2: Inter se Priorities among Key Objectives, Success indicators and Targets

Objective	Weight	Action	Success Indicator	Unit	Weight	Target / Criteria Value				
						Excellent	Very Good	Good	Fair	Poor
						100%	90%	80%	70%	60%
			(64) achieving Micro Filaria rate of < 1 %							
		[5.3] Reduce incidence of Kala-azar	[5.3.1] BPHCs reporting less than 1 case of Kala-azar per 10000 population out of 275 remaining such BPHCs	Number	2.00	150	140	130	125	120
		[5.4] Reduce incidence of Leprosy	[5.4.1] Annual prevalence rate of < 10 per Lakh population in High burden Districts (209)	Number	1.00	75	70	65	60	55
			[5.4.2] Reconstructive Surgeries conducted	Number	0.50	3000	2700	2400	2100	1800
		[5.5] Control of Tuberculosis	[5.5.1] New Sputum Positive (NSP) Success rate	%	1.00	90	88	85	75	70
			[5.5.2] Default rate amongst CAT-II patient	%	1.00	12.5	13	13.5	14	15
			[5.5.3] MDR TB Cases notified put on treatment	%	0.50	55	50	45	40	35
		[5.6] Reduction in Prevalence of Blindness	[5.6.1] Cataract Surgeries performed (in Lakhs)	Number	0.50	70	63	56	49	42
			[5.6.2] Spectacles to school children screened with	Number	0.50	8	7.2	6.4	5.6	4.8

Section 2:
Inter se Priorities among Key Objectives, Success indicators and Targets

Objective	Weight	Action	Success Indicator	Unit	Weight	Target / Criteria Value				
						Excellent 100%	Very Good 90%	Good 80%	Fair 70%	Poor 60%
			refractive error (in Lakhs)							
			[5.6.3] Collection of donated eyes for corneal transplantation	Number	0.50	50000	45000	40000	35000	30000
			[5.7.1] Development of District Cancer Facilities	Number	0.50	75	70	65	60	50
		[5.7] Strengthening facilities for diagnosis and treatment of cancer	[5.7.2] Strengthening of Tertiary Cancer Centres	Number	1.00	5	4	3	2	1
			[5.8.1] Operationalization of new Tobacco Testing labs for Nicotine and Tar	Number	0.50	6	4	3	2	1
			[5.9.1] Starting of Academic Session in Centres of Excellence	Number	1.00	5	4	3	2	1
		[5.9] Ensure availability of minimum mental health care services	[5.9.2] Approval for starting up of PG courses in Mental Health Specialities	Number	0.50	25	20	15	10	5
			[5.10.1] Set up NCD Clinics and Cardiac Care Units in District Hospitals	Number	0.50	80	70	60	50	40
			[5.10.2] Screening of NCDs at District Hospitals and	Number	0.50	80	70	60	50	40

Section 2:

Section 4: Acronym

Sl.No	Acronym	Description
1	ANM	Auxiliary Nurse Midwife
2	API	Annual Parasite Incidence
3	ASHA	Accredited Social Health Activist
4	AYUSH	Ayurveda Yoga-Naturopathy Unani Siddha & Homoeopathy
5	BPHCs	Block Primary Health Centres
6	CHC	Community Health Centre
7	DPMR	Disability Prevention and Medical Rehabilitation
8	FRU	First Referral Unit
9	IMR	Infant Mortality Rate

Section 4: Acronym

Sl.No	Acronym	Description
10	IUD	Intra Uterine Devices
11	MDR-TB	Multi Drug Resistance - Tuberculosis
12	MMR	Maternal Mortality Ratio
13	MMU	Mobile Medical Unit
14	NACO	National AIDS Control Organization
15	NCD	Non Communicable Diseases
16	NIPS	National Institute of Paramedical Sciences
17	PHC	Primary Health Centre
18	PRI	Panchayati Raj Institutions

Section 4:

1	[1.1.1] Operationalization of 24x7 Facility at PHC level out of the total number of 24000 PHCs	PRIMARY HEALTH CENTRES (PHCS)	PHC is the first contact point between village community and the Medical Officer. The PHCs were envisaged to provide an integrated curative and preventive health care to the rural population with emphasis on preventive and promotive aspects of health care. The PHCs are established and maintained by the State Governments under the Minimum Needs Programme (MNP)/Basic Minimum Services (BMS) Programme. As per minimum requirement a PHC is to be manned by a Medical Officer supported by 14 paramedical and other staff. There were 23,887 PHCs functioning in the country as on March 2011.	STAFF FOR NEW PRIMARY HEALTH CENTRE Medical Officer..... 1 Pharmacist..... 1 Nurse Mid-wife (Staff Nurse)..... 1 + 2 additional Staff Nurses on contract Health Worker (Female)/ANM..... 1 Health Educator..... 1 Health Assistant (Male)..... 1 Health Assistant (Female)/LHV..... 1	OPERATIONALISATION OF 24 X 7 FACILITY AT PHC LEVEL To ensure round the clock access to public health facilities, Primary Health Centres are expected to provide 24-hour service in basic Obstetric and Nursing facilities. Under NRHM, PHCs are being operationalized for providing 24x7 services in a phased manner by placing at least 1-2 Medical Officers and more than 3 Staff Nurses in these facilities. All 24x7 PHCs, providing delivery services, would also have newborn care corners and provide basic new born care services including resuscitation, prevention of infections, provision of warmth and early and exclusively breast feeding.

26	[5.5.2] Default rate amongst CAT-II patient	CATEGORY II TREATMENT UNDER TUBERCULOSIS PROGRAMME	Management of patients who have been previously treated for tuberculosis (TB) has been a cause of much debate. ¹ In 1991, the World Health Organization (WHO) recommended the use of the "category II retreatment regimen" for all patients with a prior history of TB treatment. The category II regimen added streptomycin to the first-line agents and extended treatment to 8 months. Multiple observational studies have examined outcomes among individuals receiving category II treatment and shown mixed results. Overall success rates are in the 60–80% range, with notably worse outcomes seen among patients who failed or relapsed after their initial treatment episode.

27	[5.5.3] MDR TB Cases notified put on treatment	MULTI-DRUG-RESISTANT TUBERCULOSIS (MDR-TB)	Multi-drug-resistant tuberculosis (MDR-TB) is defined as tuberculosis that is resistant to at least isoniazid (INH) and rifampicin (RMP), the two most powerful first-line treatment anti-TB drugs. Isolates that are multiply resistant to any other combination of anti-TB drugs but not to INH and RMP are not classed as MDR-TB. MDR-TB develops in otherwise treatable TB when the course of antibiotics is interrupted and the levels of drug in the body are insufficient to kill 100% of bacteria. This can happen for a number of reasons: Patients may feel better and halt their antibiotic course, drug supplies may run out or become scarce, patients may forget to take their medication from time to time or patients do not receive effective therapy.

Sl.No	Success indicator	Description	Definition	Measurement	General Comments
27	[5.5.3] MDR TB Cases notified put on treatment	MULTI-DRUG-RESISTANT TUBERCULOSIS (MDR-TB)	Most tuberculosis therapy consists of short-course chemotherapy which is only curing a small percentage of patients with multi-drug resistant tuberculosis. Delays in second line drugs make multi-drug resistant tuberculosis more difficult to treat. MDR-TB is spread from person to person as readily as drug-sensitive TB and in the same manner. Even with the patent off second line antituberculosis medication the price is still high and therefore a big problem for patients living in poor countries to be treated..		
28	[5.6.1] Cataract Surgeries performed (in Lakhs)	CATARACT	A cataract is a clouding of the lens inside the eye which leads to a decrease in vision. It is the most common cause of blindness and is conventionally treated with surgery. Visual loss occurs because

28	[5.6.1] Cataract Surgeries performed (in Lakhs)	CATARACT	opacification of the lens obstructs light from passing and being focused on to the retina at the back of the eye. It is most commonly due to biological aging but there are a wide variety of other causes. Over time, yellow-brown pigment is deposited within the lens and this, together with disruption of the normal architecture of the lens fibers, leads to reduced transmission of light, which in turn leads to visual problems. Those with cataract commonly experience difficulty appreciating colors and changes in contrast, driving, reading, recognizing faces, and experience problems coping with glare from bright lights

29	[5.6.2] Spectacles to school children screened with refractive error (in Lakhs)	NATIONAL PROGRAMME FOR CONTROL OF BLINDNESS	4. To secure participation of civil society and the private sector.		
30	[5.7.1] Development of District Cancer Facilities	District Cancer Control Programme	This programme was launched in 1990-91 and under this programme each state and union territory has advised to prepare their projects on health education, early detection, and pain relief measures. For this they can get up to Rs. 15 lakh one time assistance and Rs. 10 lakh for four years recurring assistance. The district programme has five elements: 1. Health education; 2. Early detection; 3. Training of medical & paramedical personnels. 4. Palliative treatment and pain relief. 5. Coordination and monitoring. The District programmes are linked with Regional Cancer Centres/ Government Hospitals/ Medical

30	[5.7.1] Development of District Cancer Facilities	District Cancer Control Programme	Colleges. For effective functioning each district where programme is started have one District Cancer Society that is chaired by local Collector/Chief Medical Officer. Other members are Dean of medical college, Zila parishad representative, NGO representative etc.		
31	[5.7.2] Strengthening of Tertiary Cancer Centres	NATIONAL CANCER CONTROL PROGRAMME	In India it is estimated that there are 2 to 2.5 million cancer patients at any given point of time with about 0.7 million new cases coming every year and nearly half die every year. Two-third of the new cancers are presented in advance and incurable stage at the time of diagnosis. More than 60% of these affected patients are in the prime of their life between the ages of 35 and 65 years. With increasing life expectancy and changing life styles

31	[5.7.2] Strengthening of Tertiary Cancer Centres	NATIONAL CANCER CONTROL PROGRAMME	concomitant with development, the number of cancer cases will be almost three times the current number. It has long been realised that cancers of the head and neck in both sexes and of the uterine cervix in women are the most common malignancies seen in the country. The age adjusted incidence rate per 100,000 for all types in India in urban areas range from 106-130 for men and 100-140 for women but still lower than USA, UK and Japan rates. 50% of all male cancers are tobacco related and 25% in female (total 34% of all cancers are tobacco related). There are predictions of incidence of 7 fold increase in tobacco related cancer morbidity in between 1995-2025. To control this problem the Govt. of
