Section 1:

Vision, Mission, Objectives and Functions

Vision

To be the best and most innovative National Statistical System in the world; and to effectively monitor the programmes and projects for ensuring efficient use of national resources.

Mission

1. To make available reliable and timely statistics and to undertake regular assessment of data needs for informed decision making.
2. To cater to the emerging data needs in a dynamic socio-economic context, to reduce respondent burden and to avoid unnecessary duplication in data collection and publication.
3. To adopt and evolve standards and methodologies for statistics generated by various elements of the National Statistical System and to steer its development for further improvement and bridging data gaps.
4. To ensure and strengthen trust and confidence of all stake holders in the National Statistical System by maintaining confidentiality of data providers and promoting integrity and impartiality of all elements of official statistics.
5. To provide leadership and coordination to ensure harmonious, efficient and integrated functioning of all the elements of the National Statistical System.
6. To continue to assess skill requirement, and develop human resource capacity at all levels of the statistical system.
7. To participate and contribute actively in all international initiatives and to support development of Statistical Systems around the world.
8. To facilitate and monitor infrastructure and large central projects to achieve high performance levels through systems improvement, and adoption of best practices.
9. To facilitate and monitor the implementation of Member of Parliament Local Area Development Scheme (MPLADS), Twenty Point Programme and other programmes and schemes for socio-economic development of the country.

Objectives

- 1 To make available data/statistics on some key parameters to Planners and Policy makers in Government and outside
- 2 To improve the quality and reliability of existing data sets and reduce time lag in bringing out statistics
- 3 To make available new data sets on emerging fields to meet the demand of policy makers and planners

- 4 To implement and monitor the Member of Parliament Local Area Development Scheme (MPLADS)
- 5 To monitor central projects of Rs. 150 crores and above, and release regular reports
- 6 To monitor the performance of Infrastructure Sectors, and release regular reports
- 7 To monitor the Twenty Point Programme, and release regular reports

Functions

The Ministry of Statistics and Programme Implementation is the nodal agency for planning and facilitating the integrated development of the statistical system in the country, and to lay down norms & standards in the field of official statistics, evolving concepts, definitions, classification and methodologies of data collection, processing and release of results, etc. The Ministry is also responsible for monitoring and evaluation of major projects and programmes of the Government, besides implementing Member of Parliament Local Area Development Scheme (MPLADS).

Section 4:

Description and Definition of Success Indicators and Proposed Measurement Methodology

1. Estimation of National Income: The national accounts provide a comprehensive, conceptual, and accounting framework for analysing and evaluating the performance of an economy. As the national accounts are designed to account for all economic transactions, their compilation is a major exercise drawing information from several diverse data source, and adopting different approaches like expenditure approach, income approach and production approach.

2. Consumer Price Index (CPI) Numbers: The Central Statistics Office compiles monthly CPI for Urban, Rural and Combined, (Base 2010 = 100) at State/UT/All India level covering the entire population. All cities/towns having population (2001 Population Census) of more than 9 lakh and all State/UT capitals not covered therein and other towns were selected randomly. Total number of towns selected across the country is 310. Allocation of markets and rented dwellings to the selected towns was done on the basis of 2001 population of the town. Total number of selected markets is 1114 and these markets represent different geographical area of the town and also popularity among different segments of the population (poor, middle and affluent) living in the town. Regular price and rent data are being collected by the NSSO (FOD). For price collection in the rural areas a total of 1181 villages have been selected at all India level. The broad criterion of selection of villages is to have representation of all the districts within State/UT. Villages from each district, adjusted on the basis of rural population of the State/UT, have been selected randomly from different tehsils. Rural price data are being collected by Department of Posts. Annual National inflation rates based on these indices are released with effect from January 2012 along with the indices for the month.

3. Micro data Management Toolkit Software: The International Household Survey Network (IHSN) was established in September 2004. The IHSN is served by a Secretariat managed by the World Bank Development Data Group and the Paris21 Secretariat at OECD. The mission of the IHSN is to foster the improvement of the availability, accessibility and quality of survey data in developing countries, and to encourage their analysis and use by national and international development decision makers, the research community, and other stakeholders. Micro data Management Toolkit helps document your surveys and censuses in compliance with international standards like DDI using this specialized metadata editor. Data Documentation Initiative (DDI) is an effort to create an international standard in XML for metadata describing micro data especially social science data. The Toolkit software takes the entire life cycle of the microdata and produces XML and Nesstar (Networked Social Science Tools and Resources, software for publishing data on the web) files from which dissemination is possible in CD or WEB format.

4. Crop Cutting Experiments: The Field Operation Division of the National Sample Survey Office (NSSO) conducts crop cutting experiments to generate yield estimates of major crops. Stratified multi stage random sampling design is adopted for carrying out

Section 4:

Description and Definition of Success Indicators and Proposed Measurement Methodology

these surveys with tehsil, taluks etc. as strata, revenue village within a strata as first stage unit of sampling, survey numbers/fields within each selected village as sampling unit at the second stage and an experimental plot of a specified shape and size as the ultimate unit of sample.

5. Sample Check on Area Enumeration: The estimation of areas statistics is made by the National Sample Survey Office with the co-operation for the States /UTs. The prime objective is to generate timely and reliable estimates of area under principal crops for each of the agricultural seasons.

6. NSS Socio-Economic Surveys: The National Sample Survey Office conducts nationwide sample surveys on various socio-economic issues in successive rounds, each round covering subjects of current interest in a specific survey period. The period of survey is of one year duration, starting on 1st July and ending on 30th June. The survey period of each round is divided into four sub-rounds of three months' duration. In each of these four sub-rounds, equal numbers of sample villages/ blocks are allotted for survey with a view to ensuring uniform spread of sample over the entire survey period. A stratified multi-stage design has been adopted for the surveys.

7. Monitoring of Projects: The Ministry of Statistics and Programme Implementation monitors the performance of the country's eleven key infrastructure sectors, viz., Power, Coal, Steel, Railways, Telecommunications, Ports, Fertilizers, Cement, Petroleum & Natural Gas, Roads and Civil Aviation with the special focus on removing the bottlenecks in the way of their accelerated growth. A monthly review Report of Infrastructure Performance and Capsule Report on Infrastructure Performance is brought out as a part of the monitoring of infrastructure sectors based on the information received from concerned Ministries/Departments. In addition, the Ministry monitors all Central Sectors projects of the Government costing Rs.150 crores and above on a monthly basis through a system of Flash Reports. These projects are monitored against the milestones set at the commencement of the projects.

8. Monitoring of 20-Point Programme: The Twenty Point Programme 2006 is a package of social sector schemes and programmes administered by various Ministries of Government of India and implemented mainly by States and UTs. The Twenty Point Programme consists of 65 items. The primary responsibility of implementation and monitoring of the programmes lies with the agencies entrusted with the execution of the programme i.e. State Government/UT Administrations and Central Nodal Ministries. At the Centre, the progress of schemes/programmes covered under TPP 2006 is monitored by the Central Nodal Ministries concerned. At the State level the concerned Nodal Departments, mostly Planning Department monitors the programme. The monitoring of the programme by MOSPI is made in holistic manner on certain selected indicators.

9. The monitoring mechanism in MOSPI is based on the information collected from the Central Nodal Ministries and the State Government/UT Administrations on the selected

Section 4:

Description and Definition of Success Indicators and Proposed Measurement Methodology

indicators known as parameters. The information is collected on all 65 items on annual basis and on selected items on monthly basis. MOSPI brings out a monthly progress report indicating the achievements for monthly monitored items on the basis of information received from States/UTs and Central Nodal Ministries. MOSPI also brings out an Annual Progress Report of all the items covered under the TPP 2006. With a view to monitor the programme more effectively States have set up monitoring committee at State level, District level and Block level. MOSPI also make suggestions to States/UT's to improve the implementation of laggard schemes. MOSPI also awards impact assessment studies to find the bottlenecks in the implementation of the programme and to assess the benefits reaching out to the main beneficiaries.

10. Monitoring of MPLAD Scheme: For effective implementation of the works taken up under this scheme, each State Government/UT Administration has designated one nodal Department for physical monitoring through field inspection and for coordination with the Ministry of Statistics and Programme Implementation. The Heads of Districts are required to visit and inspect at least 10% of these works every year. Similarly, it is the responsibility of the senior officers of implementing agencies of these works to regularly visit the work spots and ensure that the works are progressing satisfactorily as per the prescribed procedures and specifications. Likewise, officers of district at the sub-divisional and block level are also closely monitoring implementation of these works through visits to work sites. A schedule of inspections which prescribes the minimum number of field visits for each supervisory level functionary of the implementing agencies is to be drawn up by MOSPI. A software for monitoring MPLADS works, in which provision has been made for the district authorities to upload the details of works, so as to enable universal online access with a view to facilitate increase in transparency, accountability and promote e-governance, has been launched from November, 2004. The District Authorities are responsible to upload the data of works in the software, which is monitored by the Ministry. The Ministry has also embarked on a radical monitoring initiative, by initiating direct physical monitoring of MPLADS works on a sample basis in various districts of the country.
